

No Sweat Bet Discord Setup Guide

Server: No Sweat Bet. 📖 💰

Goal: Add a first-half football product section into the existing server without disrupting the current hockey / betting community.

Prepared for Vincent. This is the exact build order and copy to use.

Core principle: build this as a contained product area inside the current server.

- Do not rebuild the whole server.
- Keep existing hockey identity intact.
- Use public proof to build trust.
- Use premium alerts as the paid layer.

1. Create the roles first

In Discord, open the server, then go to `Server Settings` → `Roles`.

1. Create role **fh-free**
2. Create role **fh-premium**
3. Create role **fh-vip** (optional for now)

If you want to keep it simpler for launch, just create:

- **fh-member**
- **fh-premium**

2. Create the categories and channels in this exact order

Category A: FIRST-HALF FOOTBALL

- **fh-how-it-works**
- **fh-results**
- **fh-free-picks**
- **fh-chat**

Category B: FH PREMIUM

- **fh-premium-alerts**
- **fh-premium-board**
- **fh-league-insights**

Category C: FH ADMIN

- **fh-admin**
- **fh-payment-issues**
- **fh-bot-log**

3. Set permissions

FIRST-HALF FOOTBALL

- `@everyone` can see **fh-how-it-works** and **fh-results**
- **fh-free** can also see **fh-free-picks** and **fh-chat**

FH PREMIUM

- Only **fh-premium**, **fh-vip**, mods, and admins can see it
- Hide this whole category from everyone else

FH ADMIN

- Admins and mods only
- No members should see this category

4. What each channel is for

- **fh-how-it-works**: the conversion page inside Discord
- **fh-results**: every posted result logged here, no chatter
- **fh-free-picks**: 1 to 2 free daily picks max
- **fh-chat**: general football / first-half discussion
- **fh-premium-alerts**: fast clean paid alerts only
- **fh-premium-board**: full daily slate with context
- **fh-league-insights**: performance notes, league trends, hot/cold runs

5. Seed the server so it does not look empty

Before inviting anyone or announcing the new section, post these in order:

1. Post and pin the intro in [fh-how-it-works](#)
2. Post and pin the results policy in [fh-results](#)
3. Post and pin the free-picks note in [fh-free-picks](#)
4. Add at least 3 example result posts to [fh-results](#)
5. Add 1 example free pick post to [fh-free-picks](#)
6. Add 1 example premium alert to [fh-premium-alerts](#)

6. Use this exact pinned copy

Pin this in [fh-how-it-works](#)

What this is

This section focuses on first-half football goal signals.

We track matches before kickoff, post the signal, and then log the outcome publicly. The goal is simple: transparent first-half picks, not fake win-rate screenshots.

What free members get

- occasional free picks
- public results log
- weekly proof / recap posts

What premium members get

- full daily first-half board
- faster alerts
- stronger ranked spots
- league-by-league insight posts

How it works

- picks are posted before kickoff
- results are logged after matches finish
- performance is tracked openly

This is data-driven analysis, not guarantees.

Pin this in [fh-results](#)

Results policy

Every posted pick gets logged here after the match. That is the point. Receipts over hype.

Pin this in [fh-free-picks](#)

Free picks

This channel is for limited free first-half selections. For the full board and faster alerts, premium is in [fh-premium-alerts](#).

7. Use these exact post formats

Free pick format

Match: Team A vs Team B
Market: FH Over 1.5
Rank: 3
League: XYZ
Kickoff: 2:45 PM ET
Note: High combined FH intensity and weak defensive profile

Premium alert format

Match: Team A vs Team B
Market: FH Over 1.5 or FH Over 2.5
Rank: 3 or 4
Prob: 75%
League: XYZ
Kickoff: 2:45 PM ET
Why it qualifies:

- signal A
- signal C
- away FH attack

Results format

Match: Team A vs Team B
HT Score: 2-0
Market: FH Over 1.5
Result: WIN
Rank: 3

8. Best monetization setup inside this server

- Free: [fh-results](#) + [fh-free-picks](#)
- Paid: [fh-premium-alerts](#) + [fh-premium-board](#) + [fh-league-insights](#)

That is enough for launch. Do not overcomplicate it.

9. What not to do

- Do not dump 20 public picks a day into one channel
- Do not mix hockey and football picks in the same alert feed
- Do not turn [fh-results](#) into a chat room
- Do not use hype language like "lock", "guaranteed", or "free money"

10. Final recommendation

Use **No Sweat Bet** as the umbrella brand. Inside it, position this product as:

First-Half Football Edge

That is cleaner than launching a totally separate server too early.

11. After setup, do these next

1. Add role gating for paid users
2. Connect payment to roles (Whop, LaunchPass, etc.)
3. Automate result posting
4. Post weekly recap every Sunday

Prepared from the No Sweat Bet Discord add-in plan in your workspace.
